

Characteristics	Type of pallet	Wood	Standard cardboard	ipcube	ipcube advantages
Manufactured on site		X	X	●	Simple ipcubemaker production process, on site & on demand
Storage area reduced		X	X	●	Dramatically reduce area needed to stock empty pallets, stock only flat cardboard, ten fold reduction in space required
Easily reinforced /resistant		X	X	●	With the stickcube reinforce pallets when necessary
Made to measure at no extra cost		X	X	●	With our modular ipcubemaker solution make standard or made to measure pallets at the same cost
Easily repaired		X	X	●	With the Stickcube damaged pallets can be easily repaired
Reusable		●	X	●	Our pallets are robust and resistant & can be reused
Can be used on conveyor line		●	X	●	Our pallets are extremely resistant & are compatible with use on a conveyor line
Humidity resistant		●	X	●	The design of the cube & use of a specific Kraftliner provides enhanced moisture resistance without compromising performance
Lightweight (transport cost savings)		X	●	●	Weighing between 2-5 kg up to 1 tonne can be saved per full truck load, the lighter weight reduces dramatically operator MSD
Interlayer pallet		X	●	●	The ipcubes on the palcubes can be rearranged to optimize packaging and avoid damaging merchandise
Operator friendly		X	●	●	Palcube pallets do not have nails,splinters,staples nor sharp edges, no risk of operator injury
Marketing / Branding possible		X	●	●	Palcube pallets can be personalised with your company colours. Cubes & decks become effective communication vectors using preprinted carton
Stackable pallet		●	●	●	Palcube pallets can resist up to 1500kg of dynamic load & can be stacked
Pallet can be racked		●	●	●	In storage racks with slatted floor
Used for export		● if ISPM15 treated	●	●	Intrinsically hygienic, palcube pallets do not require ISPM 15 treatment
Environmentally friendly / respects the environment		● if PEFC	●	●	Palcube pallets are 100% recyclable
